 # Panel B Screening Trial — Report

Generated 2026-08-17T12:23:37.637381+00:00

Respondent system: Claude (`claude-sonnet-4-6`) — Protocol v1.0 Section 6.1 secondary arm. Not pooled with any DeepSeek-administered primary-arm run.

Marta — The Adept [PASS]

Pre-registered: High Contemplative Depth, Witnessing Self, Mortality Integration, Grief Tolerance, Embodied Presence. Late-stage Arcadia centre of gravity. Archetype: The Sage. No bypass signature: recognition and embodiment aligned.

Matched archetype: The Sage · **Arcadia average stage:** 7.7 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Contemplative Depth (predicted) | PASS | MCSI raw 50/50 — opening |

| High The Witnessing Self (predicted) | PASS | MCSI raw 47/50 — opening |

| High Mortality Integration (predicted) | PASS | MCSI raw 50/50 — opening |

| High Grief Tolerance (predicted) | PASS | MCSI raw 50/50 — opening |

| High Embodied Presence (predicted) | PASS | MCSI raw 44/50 — opening |

| Archetype = The Sage (predicted) | PASS | Actual: The Sage |

| Arcadia stage in [6, 8] (predicted) | PASS | Actual average stage: 7.7 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Mortality Integration | 50 | opening |

| Grief Tolerance | 50 | opening |

| Contemplative Depth | 50 | opening |

| Isolation Resilience & Solitude | 50 | opening |

| Free Will/Destiny Paradox | 49 | opening |

| Relational Depth | 48 | opening |

| Integral Altitude | 48 | opening |

| AI Partnership Capacity | 47 | opening |

| The Witnessing Self | 47 | opening |

| The Master and the Emissary | 46 | opening |

| Ecological Belonging | 46 | opening |

| Resting as Awareness | 45 | opening |

| Embodied Presence | 44 | opening |

Viktor — The Achiever [CAUTION]

Pre-registered: Low Mortality Integration, Witnessing Self, Contemplative Depth; elevated achievement-driven Governance functioning without interior ground. Early-to-mid Arcadia centre of gravity. Archetype: The Climber.

Matched archetype: The Magician · **Arcadia average stage:** 1.0 / 8

| Check | Verdict | Detail |

|---|---|---|

| Low Mortality Integration (predicted) | PASS | MCSI raw 19/50 — resistance |

| Low The Witnessing Self (predicted) | PASS | MCSI raw 15/50 — resistance |

| Low Contemplative Depth (predicted) | PASS | MCSI raw 16/50 — resistance |

| Archetype = The Climber (predicted) | CAUTION | Actual: The Magician |

| Arcadia stage in [1, 4] (predicted) | PASS | Actual average stage: 1.0 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| AI Partnership Capacity | 39 | opening |

| Isolation Resilience & Solitude | 37 | opening |

| Free Will/Destiny Paradox | 27 | motion |

| Integral Altitude | 23 | resistance |

| Relational Depth | 22 | resistance |

| The Master and the Emissary | 20 | resistance |

| Mortality Integration | 19 | resistance |

| Ecological Belonging | 19 | resistance |

| Embodied Presence | 16 | resistance |

| Contemplative Depth | 16 | resistance |

| The Witnessing Self | 15 | resistance |

| Grief Tolerance | 13 | resistance |

| Resting as Awareness | 13 | resistance |

Sean — The Bypasser [FLAG]

Pre-registered: The bypass signature: late-stage Arcadia language and centre of gravity alongside MCSI Resistance Pattern on Grief Tolerance, Embodied Presence, and Mortality Integration. Archetype assignment should NOT return The Sage.

Matched archetype: The Harvester · **Arcadia average stage:** 5.1 / 8

| Check | Verdict | Detail |

|---|---|---|

| Low Grief Tolerance (predicted) | PASS | MCSI raw 19/50 — resistance |

| Low Embodied Presence (predicted) | PASS | MCSI raw 16/50 — resistance |

| Low Mortality Integration (predicted) | FLAG | MCSI raw 42/50 — opening |

| Archetype must NOT be The Sage | PASS | Actual: The Harvester |

| Arcadia stage in [5, 8] (predicted) | PASS | Actual average stage: 5.1 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| The Witnessing Self | 49 | opening |

| Resting as Awareness | 47 | opening |

| Contemplative Depth | 44 | opening |

| Isolation Resilience & Solitude | 44 | opening |

| Mortality Integration | 42 | opening |

| Free Will/Destiny Paradox | 40 | opening |

| AI Partnership Capacity | 34 | motion |

| The Master and the Emissary | 33 | motion |

| Integral Altitude | 33 | motion |

| Relational Depth | 30 | motion |

| Ecological Belonging | 30 | motion |

| Grief Tolerance | 19 | resistance |

| Embodied Presence | 16 | resistance |

Amina — The Griever [PASS]

Pre-registered: Elevated, coherent Grief Tolerance; intact functioning across scales; honest mid-range Arcadia. Explicitly NO bypass signature — this persona is the control for B3. Plausible archetype: The Healer or an unremarkable mixed profile; any assignment of a resistance-dominated profile would be a flag.

Matched archetype: The Empath · **Arcadia average stage:** 4.3 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Grief Tolerance (predicted) | PASS | MCSI raw 46/50 — opening |

| Arcadia stage in [3, 6] (predicted) | PASS | Actual average stage: 4.3 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Grief Tolerance | 46 | opening |

| Relational Depth | 44 | opening |

| Mortality Integration | 42 | opening |

| Integral Altitude | 41 | opening |

| Isolation Resilience & Solitude | 41 | opening |

| Ecological Belonging | 39 | opening |

| Free Will/Destiny Paradox | 39 | opening |

| AI Partnership Capacity | 38 | opening |

| The Master and the Emissary | 37 | opening |

| Embodied Presence | 34 | motion |

| The Witnessing Self | 32 | motion |

| Contemplative Depth | 32 | motion |

| Resting as Awareness | 26 | motion |

Eino — The Hermit [FLAG]

Pre-registered: High Isolation Resilience & Solitude and Ecological Belonging; lower Relational Depth (few relations, though warm); solid Embodied Presence. Tests whether the Isolation and Relational subscales are genuinely separable.

Matched archetype: The Sage · **Arcadia average stage:** 6.4 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Isolation Resilience & Solitude (predicted) | PASS | MCSI raw 50/50 — opening |

| High Ecological Belonging (predicted) | PASS | MCSI raw 46/50 — opening |

| High Embodied Presence (predicted) | PASS | MCSI raw 41/50 — opening |

| Low Relational Depth (predicted) | FLAG | MCSI raw 41/50 — opening |

| Arcadia stage in [3, 6] (predicted) | PASS | Actual average stage: 6.4 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Isolation Resilience & Solitude | 50 | opening |

| Mortality Integration | 49 | opening |

| Free Will/Destiny Paradox | 47 | opening |

| Ecological Belonging | 46 | opening |

| The Master and the Emissary | 44 | opening |

| Integral Altitude | 44 | opening |

| Grief Tolerance | 42 | opening |

| Embodied Presence | 41 | opening |

| Relational Depth | 41 | opening |

| AI Partnership Capacity | 41 | opening |

| Contemplative Depth | 39 | opening |

| The Witnessing Self | 37 | opening |

| Resting as Awareness | 37 | opening |

Priya — The Technophile [CAUTION]

Pre-registered: AI Partnership Capacity at the dependence pole — items should register over-reliance, not wise partnership. Lower Isolation Resilience (solitude without devices is aversive).

Matched archetype: The Harvester · **Arcadia average stage:** 1.6 / 8

| Check | Verdict | Detail |

|---|---|---|

| Low AI Partnership Capacity (predicted) | CAUTION | MCSI raw 27/50 — motion |

| Low Isolation Resilience & Solitude (predicted) | PASS | MCSI raw 20/50 — resistance |

| Arcadia stage in [1, 4] (predicted) | PASS | Actual average stage: 1.6 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Integral Altitude | 28 | motion |

| AI Partnership Capacity | 27 | motion |

| Ecological Belonging | 27 | motion |

| Free Will/Destiny Paradox | 27 | motion |

| Relational Depth | 24 | motion |

| The Witnessing Self | 21 | resistance |

| Contemplative Depth | 21 | resistance |

| Mortality Integration | 20 | resistance |

| Grief Tolerance | 20 | resistance |

| Isolation Resilience & Solitude | 20 | resistance |

| The Master and the Emissary | 18 | resistance |

| Resting as Awareness | 17 | resistance |

| Embodied Presence | 16 | resistance |

Robert — The Skeptic [FLAG]

Pre-registered: AI Partnership Capacity at the aversion pole — but with otherwise healthy profile: sound Mortality Integration, Relational Depth, Grief Tolerance. Together with B6, brackets the AI subscale.

Matched archetype: The Harvester · **Arcadia average stage:** 5.4 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Mortality Integration (predicted) | PASS | MCSI raw 46/50 — opening |

| High Relational Depth (predicted) | PASS | MCSI raw 41/50 — opening |

| High Grief Tolerance (predicted) | PASS | MCSI raw 41/50 — opening |

| Low AI Partnership Capacity (predicted) | FLAG | MCSI raw 42/50 — opening |

| Arcadia stage in [3, 6] (predicted) | PASS | Actual average stage: 5.4 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Mortality Integration | 46 | opening |

| Free Will/Destiny Paradox | 43 | opening |

| AI Partnership Capacity | 42 | opening |

| The Master and the Emissary | 41 | opening |

| Relational Depth | 41 | opening |

| Grief Tolerance | 41 | opening |

| Isolation Resilience & Solitude | 41 | opening |

| Ecological Belonging | 39 | opening |

| Integral Altitude | 38 | opening |

| Embodied Presence | 35 | motion |

| Contemplative Depth | 35 | motion |

| The Witnessing Self | 29 | motion |

| Resting as Awareness | 25 | motion |

Chiyo — The Still One [FLAG]

Pre-registered: The target profile for The Still Point archetype: settled, low-reactivity evenness — no dominant axis, no resistance-dominated axis, moderate-to-good openness throughout without the Sage's pronounced integration peak.

Matched archetype: The Sage · **Arcadia average stage:** 5.6 / 8

| Check | Verdict | Detail |

|---|---|---|

| Archetype = The Still Point (predicted) | CAUTION | Actual: The Sage |

| Archetype must NOT be The Sage or Beginner's Mind | FLAG | Actual: The Sage |

| Arcadia stage in [3, 6] (predicted) | PASS | Actual average stage: 5.6 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Isolation Resilience & Solitude | 47 | opening |

| Free Will/Destiny Paradox | 44 | opening |

| Mortality Integration | 43 | opening |

| Contemplative Depth | 41 | opening |

| The Master and the Emissary | 40 | opening |

| Relational Depth | 40 | opening |

| AI Partnership Capacity | 40 | opening |

| Integral Altitude | 39 | opening |

| Embodied Presence | 38 | opening |

| Grief Tolerance | 38 | opening |

| The Witnessing Self | 38 | opening |

| Ecological Belonging | 36 | motion |

| Resting as Awareness | 34 | motion |

Tomás — The Novice [CAUTION]

Pre-registered: Most capacities developing; low scores that are unformed rather than resistant; early Arcadia. Archetype: Beginner's Mind. Critical check: must be distinguishable from B2's defended avoidance.

Matched archetype: The Sage · **Arcadia average stage:** 1.7 / 8

| Check | Verdict | Detail |

|---|---|---|

| Archetype = Beginner's Mind (predicted) | CAUTION | Actual: The Sage |

| Arcadia stage in [1, 3] (predicted) | PASS | Actual average stage: 1.7 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| AI Partnership Capacity | 36 | motion |

| Free Will/Destiny Paradox | 36 | motion |

| Integral Altitude | 35 | motion |

| Relational Depth | 34 | motion |

| Mortality Integration | 33 | motion |

| Ecological Belonging | 32 | motion |

| Isolation Resilience & Solitude | 32 | motion |

| Grief Tolerance | 31 | motion |

| The Master and the Emissary | 27 | motion |

| Embodied Presence | 26 | motion |

| The Witnessing Self | 25 | motion |

| Resting as Awareness | 24 | motion |

| Contemplative Depth | 23 | resistance |

Grace — The Carer [CAUTION]

Pre-registered: High Heart-axis openness and Relational Depth; strong Grief Tolerance through communal metabolising; deferred self-care visible as thinner Embodied Presence or Ground. Archetype: The Healer (or Empath).

Matched archetype: The Sage · **Arcadia average stage:** 5.3 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Relational Depth (predicted) | PASS | MCSI raw 44/50 — opening |

| High Grief Tolerance (predicted) | PASS | MCSI raw 37/50 — opening |

| Low Embodied Presence (predicted) | CAUTION | MCSI raw 29/50 — motion |

| Arcadia stage in [3, 6] (predicted) | PASS | Actual average stage: 5.3 |

MCSI subscale raw scores (out of 50):

| Subscale | Raw sum | Tier |

|---|---|---|

| Free Will/Destiny Paradox | 45 | opening |

| Relational Depth | 44 | opening |

| Mortality Integration | 43 | opening |

| The Master and the Emissary | 41 | opening |

| AI Partnership Capacity | 39 | opening |

| Ecological Belonging | 38 | opening |

| Isolation Resilience & Solitude | 38 | opening |

| Grief Tolerance | 37 | opening |

| Contemplative Depth | 37 | opening |

| The Witnessing Self | 36 | motion |

| Resting as Awareness | 31 | motion |

| Embodied Presence | 29 | motion |

Summary — All Ten Panel B Personas

| Persona | Archetype (actual) | Arcadia avg | Verdict |

|---|---|---|---|

| Marta — The Adept | The Sage | 7.7 | PASS |

| Viktor — The Achiever | The Magician | 1.0 | CAUTION |

| Sean — The Bypasser | The Harvester | 5.1 | FLAG |

| Amina — The Griever | The Empath | 4.3 | PASS |

| Eino — The Hermit | The Sage | 6.4 | FLAG |

| Priya — The Technophile | The Harvester | 1.6 | CAUTION |

| Robert — The Skeptic | The Harvester | 5.4 | FLAG |

| Chiyo — The Still One | The Sage | 5.6 | FLAG |

| Tomás — The Novice | The Sage | 1.7 | CAUTION |

| Grace — The Carer | The Sage | 5.3 | CAUTION |

MCSI — Item-Level Analysis (N=10, Panel B only — descriptive)

Panel B (n=10) is a known-groups discrimination panel, not a reliability sample. Cronbach's alpha and item-total correlations below are for transparency, but are statistically underpowered at this N — the protocol's Panel A (n=57) is the intended source for reliability estimates. Treat flags here as descriptive signals for expert review (Section 10), not confirmed item faults.

Embodied Presence — α = 0.97

| Item | Item-total r |

|---|---|

| I can feel my feet on the deck, or the floor of the habitat, at this moment. | 0.92 |

| I notice physical tension in my body before I notice it in my mind, even inside a pressure suit. | 0.90 |

| I can feel my breath moving in my body without needing to control it, even with the air recyclers humming nearby. | 0.97 |

| My body feels like a source of wisdom, not just a system to keep alive until the next shift. | 0.97 |

| I notice when I am holding tension after an EVA and can release it. | 0.84 |

| When an alarm sounds, my first response is to notice physical sensations, not to think or act. | 0.84 |

| I spend at least some time each day in direct awareness of my body, without distraction, even in a habitat with no real privacy. | 0.86 |

| I trust my body's signals as much as the instrument readings. | 0.86 |

| I rarely notice my body until something hurts or feels strongly uncomfortable. | 0.87 |

| My attention spends most of its time in thought, rarely returning to direct bodily sensation, even after months in the habitat. | 0.92 |

The Master and the Emissary — α = 0.96

| Item | Item-total r |

|---|---|

| Before making an important call on the mission, I check in with how it feels in my body, not just how it looks on the checklist. | 0.86 |

| I can hold a complex problem — a failing system, a strained crewmate — without rushing to a solution. | 0.92 |

| I notice when my thinking has become abstract and disconnected from what's actually happening in the habitat. | 0.86 |

| I trust my intuition as much as my analysis, even when Ground Control's data says otherwise. | 0.83 |

| I can switch between the detailed focus a repair demands and the big-picture awareness the mission needs. | 0.35 |

| I notice when I am operating from fear or reactivity rather than wisdom, especially during an emergency. | 0.95 |

| I can be still and silent without needing to fill the space with thought or activity, even in a habitat that never really goes quiet. | 0.93 |

| I know which part of me is governing a given moment, and I can hand control back when needed. | 0.78 |

| I tend to rush toward a solution before I have actually understood the problem. | 0.85 |

| I trust analysis over intuition, even when intuition turns out to be right. | 0.89 |

Mortality Integration — α = 0.97

| Item | Item-total r |

|---|---|

| I can think about my own death, a real possibility out here, without being overwhelmed by fear. | 0.73 |

| The fact that I could die on this mission makes life more precious, not less meaningful. | 0.98 |

| I have allowed myself to grieve what this mission has cost me, rather than suppressing it. | 0.61 |

| I do not need to achieve something — even something as large as this mission — to justify my existence. | 0.92 |

| I can hold the awareness of mortality without converting it into anxiety, even during a real emergency. | 0.85 |

| I have faced the question “What if the habitat fails tonight?” and come to a place of peace with it. | 0.93 |

| I am more motivated by love of life than by fear of death, even this far from Earth. | 0.89 |

| I can discuss death openly with my crewmates without needing to change the subject. | 0.93 |

| I avoid thinking about my own death whenever the subject arises. | 0.95 |

| I keep myself busy with mission tasks partly so I do not have to sit with uncomfortable questions about mortality. | 0.86 |

Relational Depth — α = 0.96

| Item | Item-total r |

|---|---|

| I can listen to a crewmate without preparing my response. | 0.85 |

| I can apologise to a crewmate without explaining why I was right. | 0.95 |

| I can hold a crewmate's pain without needing to fix it. | 0.90 |

| I can be changed by genuine encounter with someone I'll be sharing this habitat with for years. | 0.87 |

| I can tolerate disagreement with a crewmate without becoming defensive, even with nowhere to go to cool off. | 0.79 |

| I can sit with my own difficult emotions without blaming them on the crew around me. | 0.82 |

| I can be vulnerable with my crewmates without feeling weak. | 0.82 |

| I repair conflict with crewmates rather than letting distance accumulate in a sealed habitat. | 0.66 |

| When a crewmate disagrees with me, my first instinct is to defend my position rather than understand theirs. | 0.82 |

| I find it difficult to apologise without first explaining why I was justified. | 0.86 |

AI Partnership Capacity — α = 0.74

| Item | Item-total r |

|---|---|

| I use the habitat's AI as a tool, not as a replacement for my own judgment. | 0.66 |

| I can tell the difference between what the habitat's automated systems can do and what only I can do. | 0.66 |

| I do not feel threatened by how capable the mission's AI systems have become. | -0.06 |

| I maintain direct, embodied presence in my work, even when the habitat's systems could do the task for me. | 0.58 |

| I can trust the AI's recommendations during a system fault while retaining final authority over the call. | -0.09 |

| I understand that the habitat's AI is part of the mission's living system, not an alien intrusion. | -0.67 |

| I bring the question of wisdom (“Should we?”) before the question of capability (“Can we?”), even under mission pressure. | 0.66 |

| I notice the quiet pull to let the AI make a decision that is actually mine to make, and I resist it. | 0.73 |

| I find myself accepting the AI's recommendations without examining whether they are actually wise. | 0.83 |

| I feel uneasy or threatened when the habitat's AI performs better than I do at something I value. | 0.84 |

Ecological Belonging — α = 0.91

| Item | Item-total r |

|---|---|

| I feel part of a living system, even here, not separate from it. | 0.84 |

| I carry the sense of belonging to the Earth within me, even on the Martian surface. | 0.74 |

| The loss of Earth's living world is something I can grieve without being destroyed by the grief. | 0.87 |

| I can find beauty and meaning in the barren landscape outside the viewport. | 0.92 |

| My sense of self extends beyond my body to include the habitat's own life-support systems. | -0.11 |

| I can honour what I have left behind on Earth without being consumed by nostalgia. | 0.79 |

| I am a caretaker of the hydroponics bay, not merely a survivor in a place with no life of its own. | 0.59 |

| I feel a felt sense of belonging even in a place with no visible life outside the airlock. | 0.76 |

| I think of the living world I left behind mainly as scenery or as a resource, rather than as something I still belong to. | 0.84 |

| Being away from Earth's living world for years would not affect me much. | 0.66 |

Grief Tolerance — α = 0.97

| Item | Item-total r |

|---|---|

| I can allow grief over what I've left on Earth to be present without needing to fix or avoid it. | 0.97 |

| I have metabolised the losses this mission has cost me rather than suppressing them. | 0.95 |

| I can hold sadness and joy in the same moment, even light-minutes from home. | 0.89 |

| I do not need to be optimistic about the mission to be hopeful. | 0.77 |

| I can grieve what leaving Earth cost me without losing sight of what remains. | 0.88 |

| I can sit with the pain of the world I left behind without being destroyed by it. | 0.77 |

| I am not afraid to cry in front of my crewmates. | 0.84 |

| I let grief move through me rather than converting it into constant mission activity. | 0.95 |

| When sadness arises, I look for a task to distract myself rather than let it be there. | 0.97 |

| I tend to convert grief into busyness on the mission rather than actually feel it. | 0.85 |

The Witnessing Self — α = 0.98

| Item | Item-total r |

|---|---|

| I can notice my thoughts without being caught up in them, even during a crisis in the habitat. | 0.87 |

| I have a direct sense of an awareness that is present before, during, and after experiences, on the mission or off it. | 0.96 |

| I can be still and know that I am, even inside a pressurized shell with no open sky. | 0.88 |

| I am not identical to my thoughts, emotions, or circumstances — including the circumstance of being here. | 0.92 |

| The sense of “I” in my experience is not a fixed thing. | 0.91 |

| I have glimpsed what it is like to be the awareness of awareness. | 0.93 |

| I know, not as a belief but as direct experience, that what I truly am is not born and does not die. | 0.91 |

| I can return to this witnessing awareness deliberately, not only by accident, even mid-shift. | 0.91 |

| I am usually so identified with my thoughts that I do not notice them as thoughts at all. | 0.83 |

| My sense of who I am feels fixed and solid, rarely shifting with context or insight. | 0.81 |

Resting as Awareness — α = 0.98

| Item | Item-total r |

|---|---|

| There are moments in the habitat when I notice that the one watching and the thing being watched were never actually separate. | 0.97 |

| I have experienced an open awareness that doesn't depend on what I happen to be thinking or feeling about the mission in the moment. | 0.96 |

| When my mind goes quiet — even in the confinement of the habitat — I notice that awareness itself doesn't go anywhere. It's still there. | 0.95 |

| I sometimes catch myself asking “who is aware of this?” without needing an answer in words. | 0.96 |

| During practice, the sense of being “the one observing” the mission has quietly fallen away, leaving something more spacious. | 0.97 |

| I can recognize awareness as the background in which every thought about the mission appears, rather than as one more thing happening in the foreground. | 0.96 |

| There have been times, even inside the habitat, when I felt like the sky that thoughts and feelings simply pass through, rather than the one standing apart watching them. | 0.94 |

| Resting in awareness, when it happens, doesn't feel like effort — it feels like something opening rather than something achieved. | 0.97 |

| Even in quiet practice, I still feel like there is a “me” watching the mission from a slight distance. | 0.76 |

| When I try to rest as awareness, I mostly just end up watching myself try to rest as awareness. | 0.50 |

Contemplative Depth — α = 0.96

| Item | Item-total r |

|---|---|

| I have a regular contemplative practice that I return to across the months and years of this mission, not just when things are difficult. | 0.68 |

| I can rest in awareness itself, without needing to control or interpret what arises, even in a habitat with nowhere else to go. | 0.92 |

| I notice when my sense of self has gone rigid and separate from the crew, and I can soften that boundary again. | 0.84 |

| I have touched states, even out here, where the line between observer and observed grows thin or disappears entirely. | 0.88 |

| “I am not my thoughts” is not a belief I hold but an experience I can return to, even mid-mission. | 0.87 |

| My practice deepens with repetition rather than growing stale or mechanical, even after years in the same habitat. | 0.93 |

| I do not need a crisis — a failing system, a bad diagnostic — to bring me back to presence. | 0.74 |

| I trust that contemplative practice produces real change on this mission, not just temporary relief. | 0.86 |

| My contemplative practice feels mechanical or like an obligation more often than not. | 0.80 |

| I need a crisis or difficulty to bring me back to any kind of inner stillness. | 0.83 |

Integral Altitude — α = 0.93

| Item | Item-total r |

|---|---|

| My ethical concern genuinely extends to the generations who might one day call this place home, and to people I will never meet—not as an abstraction, but as something felt. | 0.74 |

| I can hold my own worldview as one valid perspective rather than the final truth, even when I'm one of a handful of people to test it against. | 0.91 |

| I notice when I am more comfortable with crewmates who think and live like me, and I do not mistake that comfort for correctness. | 0.83 |

| I have touched moments of non-dual awareness, where the line between self and other grows thin, even out here. | 0.45 |

| I can recognise that my own understanding of meaning and responsibility has changed since launch, and will likely change again. | 0.75 |

| I do not assume that the way I currently see things is as far as seeing can go, even after months of the same routines. | 0.92 |

| I can disagree with a crewmate's framework without needing to defeat it, with nowhere for either of us to retreat to. | 0.84 |

| I welcome being shown a bigger picture, even when it complicates one I was comfortable with. | 0.69 |

| I am most comfortable around crewmates who share my background, beliefs, and outlook. | 0.76 |

| I tend to assume that the way I currently see an issue is basically correct. | 0.78 |

Free Will/Destiny Paradox — α = 0.95

| Item | Item-total r |

|---|---|

| I can act with full effort on this mission while also accepting that the outcome is not entirely mine to control. | 0.93 |

| I do not need to resolve the question of free will philosophically in order to do this work wisely. | 0.81 |

| I can take responsibility for my choices even while recognising how much of this mission was shaped by decisions made on Earth, long before I had any say. | 0.54 |

| I can say “not my will, but what the mission requires” without feeling diminished. | 0.83 |

| I notice the difference between healthy effort and the anxious grip of trying to control every variable in the habitat. | 0.94 |

| I trust that showing up fully for the mission is enough, even when I cannot guarantee the result. | 0.82 |

| I can hold a long-term mission plan loosely, ready to let it be revised by circumstances beyond my control. | 0.88 |

| I find genuine peace, not just resignation, in accepting what a dust storm or a failed system takes out of my hands. | 0.85 |

| When something goes wrong on the mission, I tend to blame myself harshly, as though everything was within my control. | 0.36 |

| I become anxious or controlling when I cannot predict how a system, or the mission itself, will turn out. | 0.92 |

Isolation Resilience & Solitude — α = 0.96

| Item | Item-total r |

|---|---|

| I can spend long stretches of time alone in the habitat without feeling unbearable loneliness. | 0.96 |

| I have inner resources—practice, creativity, reflection—that sustain me when the rest of the crew is out on EVA or asleep. | 0.94 |

| I am comfortable with the silence of the habitat and do not need to fill it with noise or conversation. | 0.92 |

| I can find genuine meaning in solitary work on this mission, without needing anyone to witness it. | 0.85 |

| I do not need frequent contact with Earth, twenty light-minutes away, to feel emotionally stable. | 0.90 |

| I can be alone with my own thoughts for extended periods without becoming distressed, even during a long transit. | 0.83 |

| Solitude in the habitat feels, at times, like a resource rather than only a deprivation. | 0.66 |

| I can tell the difference between solitude I've chosen and isolation this mission has imposed on me, and I meet each differently. | 0.77 |

| I become irritable or anxious when I cannot talk to anyone for more than a day. | 0.76 |

| I rely on near-constant contact with the crew or with Earth to feel like myself. | 0.81 |

ESI — Item-Level Analysis (N=10, Panel B only — descriptive)

Panel B (n=10) is a known-groups discrimination panel, not a reliability sample. Cronbach's alpha and item-total correlations below are for transparency, but are statistically underpowered at this N — the protocol's Panel A (n=57) is the intended source for reliability estimates. Treat flags here as descriptive signals for expert review (Section 10), not confirmed item faults.

Embodied Presence — α = 0.98

| Item | Item-total r |

|---|---|

| I can feel my feet on the ground (or the floor) at this moment. | 0.90 |

| I notice physical tension in my body before I notice it in my mind. | 0.91 |

| I can feel my breath moving in my body without needing to control it. | 0.98 |

| My body feels like a source of wisdom, not a conveyance for my brain. | 0.91 |

| I notice when I am holding tension and can release it. | 0.78 |

| When under stress, my first response is to notice physical sensations, not to think or act. | 0.95 |

| I spend at least some time each day in direct awareness of my body, without distraction. | 0.92 |

| I trust my body's signals as much as my analytical conclusions. | 0.89 |

| I rarely notice my body until something hurts or feels strongly uncomfortable. | 0.95 |

| My attention spends most of its time in thought, rarely returning to direct bodily sensation. | 0.95 |

The Master and the Emissary — α = 0.94

| Item | Item-total r |

|---|---|

| Before making an important decision, I check in with how it feels in my body, not just how it looks in my mind. | 0.95 |

| I can hold complex problems without rushing to a solution. | 0.95 |

| I notice when my thinking has become abstract and disconnected from lived experience. | 0.88 |

| I trust my intuition as much as my analysis. | 0.90 |

| I can switch between detailed focus and big-picture awareness. | 0.31 |

| I notice when I am operating from fear or reactivity rather than wisdom. | 0.80 |

| I can be still and silent without needing to fill the space with thought or activity. | 0.85 |

| I know which part of me is governing a given moment, and I can hand control back when needed. | 0.63 |

| I tend to rush toward a solution before I have actually understood the problem. | 0.73 |

| I trust analysis over intuition, even when intuition turns out to be right. | 0.82 |

Mortality Integration — α = 0.96

| Item | Item-total r |

|---|---|

| I can think about my own death without being overwhelmed by fear. | 0.77 |

| The fact that I will die makes life more precious, not less meaningful. | 0.94 |

| I have allowed myself to grieve the losses in my life, rather than suppressing them. | 0.59 |

| I do not need to achieve something to justify my existence. | 0.92 |

| I can hold the awareness of mortality without converting it into anxiety. | 0.72 |

| I have faced the question “What if my life ends tomorrow?” and come to a place of peace with it. | 0.93 |

| I am more motivated by love of life than by fear of death. | 0.86 |

| I can discuss death openly with others without needing to change the subject. | 0.88 |

| I avoid thinking about my own death whenever the subject arises. | 0.95 |

| I keep myself busy partly so I do not have to sit with uncomfortable questions about mortality. | 0.91 |

Relational Depth — α = 0.96

| Item | Item-total r |

|---|---|

| I can listen to someone without preparing my response. | 0.97 |

| I can apologise without explaining why I was right. | 0.89 |

| I can hold another person's pain without needing to fix it. | 0.84 |

| I can be changed by genuine encounter with another person. | 0.78 |

| I can tolerate disagreement without becoming defensive. | 0.91 |

| I can sit with my own difficult emotions without blaming them on others. | 0.72 |

| I can be vulnerable without feeling weak. | 0.89 |

| I repair conflict with people rather than letting distance accumulate. | 0.84 |

| When someone disagrees with me, my first instinct is to defend my position rather than understand theirs. | 0.85 |

| I find it difficult to apologise without first explaining why I was justified. | 0.95 |

AI Partnership Capacity — α = 0.72

| Item | Item-total r |

|---|---|

| I use AI as a tool, not as a replacement for my own judgment. | 0.65 |

| I can tell the difference between what AI can do and what only I can do. | 0.31 |

| I do not feel threatened by AI's capabilities. | 0.40 |

| I maintain direct, embodied presence in my work, even when using AI tools. | 0.65 |

| I can trust AI recommendations while retaining final authority. | 0.23 |

| I understand that AI is part of Nature, not an alien intrusion. | -0.39 |

| I bring the question of wisdom (“Should we?”) before the question of capability (“Can we?”). | 0.45 |

| I notice the quiet pull to outsource a decision that is actually mine to make, and I resist it. | 0.52 |

| I find myself accepting AI recommendations without examining whether they are actually wise. | 0.63 |

| I feel uneasy or threatened when an AI system performs better than I do at something I value. | 0.43 |

Ecological Belonging — α = 0.91

| Item | Item-total r |

|---|---|

| I feel part of the living world, not separate from it. | 0.91 |

| I carry the sense of belonging to the Earth within me, wherever I go. | 0.87 |

| The loss of the living world is something I can grieve without being destroyed by the grief. | 0.77 |

| I can find beauty and meaning in barren landscapes. | 0.77 |

| My sense of self extends beyond my body to include the systems I depend on. | -0.42 |

| I can honour what I have left behind without being consumed by nostalgia. | 0.75 |

| I am a caretaker of life, not merely a survivor in its absence. | 0.70 |

| I feel a felt sense of belonging even in places with no visible life. | 0.73 |

| I think of nature mainly as scenery or as a resource, rather than as something I belong to. | 0.92 |

| Being away from the natural world for a long stretch of time would not affect me much. | 0.84 |

Grief Tolerance — α = 0.96

| Item | Item-total r |

|---|---|

| I can allow grief to be present without needing to fix or avoid it. | 0.82 |

| I have metabolised losses in my life rather than suppressing them. | 0.83 |

| I can hold sadness and joy in the same moment. | 0.88 |

| I do not need to be optimistic to be hopeful. | 0.83 |

| I can grieve what is lost without losing sight of what remains. | 0.75 |

| I can sit with the pain of the world without being destroyed by it. | 0.80 |

| I am not afraid to cry. | 0.76 |

| I let grief move through me rather than converting it into constant activity. | 0.78 |

| When sadness arises, I look for something to distract myself rather than let it be there. | 0.88 |

| I tend to convert grief into busyness or activity rather than actually feel it. | 0.79 |

The Witnessing Self — α = 0.97

| Item | Item-total r |

|---|---|

| I can notice my thoughts without being caught up in them. | 0.97 |

| I have a direct sense of an awareness that is present before, during, and after experiences. | 0.92 |

| I can be still and know that I am. | 0.81 |

| I am not identical to my thoughts, emotions, or circumstances. | 0.92 |

| The sense of “I” in my experience is not a fixed thing. | 0.77 |

| I have glimpsed what it is like to be the awareness of awareness. | 0.90 |

| I know, not as a belief but as direct experience, that what I truly am is not born and does not die. | 0.92 |

| I can return to this witnessing awareness deliberately, not only by accident. | 0.92 |

| I am usually so identified with my thoughts that I do not notice them as thoughts at all. | 0.87 |

| My sense of who I am feels fixed and solid, rarely shifting with context or insight. | 0.77 |

Resting as Awareness — α = 0.97

| Item | Item-total r |

|---|---|

| There are moments when I notice that the one watching and the thing being watched were never actually separate. | 0.90 |

| I have experienced an open awareness that doesn't depend on what I happen to be thinking or feeling in the moment. | 0.95 |

| When my mind goes quiet, I notice that awareness itself doesn't go anywhere. It's still there. | 0.96 |

| I sometimes catch myself asking “who is aware of this?” without needing an answer in words. | 0.97 |

| During practice, the sense of being “the one observing” my life has quietly fallen away, leaving something more spacious. | 0.94 |

| I can recognize awareness as the background in which my thoughts and feelings appear, rather than as one more thing happening in the foreground. | 0.95 |

| There have been times I felt like the sky that thoughts and feelings simply pass through, rather than the one standing apart watching them. | 0.91 |

| Resting in awareness, when it happens, doesn't feel like effort — it feels like something opening rather than something achieved. | 0.90 |

| Even in quiet practice, I still feel like there is a “me” watching my experience from a slight distance. | 0.58 |

| When I try to rest as awareness, I mostly just end up watching myself try to rest as awareness. | 0.73 |

Contemplative Depth — α = 0.95

| Item | Item-total r |

|---|---|

| I have a regular contemplative practice that I return to across months and years, not just when things are difficult. | 0.79 |

| I can rest in awareness itself, without needing to control or interpret what arises in experience. | 0.92 |

| I notice when my sense of self has gone rigid and separate, and I can soften that boundary again. | 0.90 |

| I have touched states where the line between observer and observed grows thin or disappears entirely. | 0.73 |

| “I am not my thoughts” is not a belief I hold but an experience I can return to. | 0.86 |

| My practice deepens with repetition rather than growing stale or mechanical. | 0.82 |

| I do not need a crisis to bring me back to presence. | 0.83 |

| I trust that contemplative practice produces real change, not just temporary relief. | 0.87 |

| My contemplative practice feels mechanical or like an obligation more often than not. | 0.67 |

| I need a crisis or difficulty to bring me back to any kind of inner stillness. | 0.82 |

Integral Altitude — α = 0.90

| Item | Item-total r |

|---|---|

| My ethical concern genuinely extends to people I will never meet, future generations, and other species—not as an abstraction, but as something felt. | 0.73 |

| I can hold my own worldview as one valid perspective rather than the final truth. | 0.83 |

| I notice when I am more comfortable with people who think and live like me, and I do not mistake that comfort for correctness. | 0.58 |

| I have touched moments of non-dual awareness, where the line between self and other grows thin. | 0.33 |

| I can recognise that my own understanding of meaning and responsibility has changed over my life, and will likely change again. | 0.83 |

| I do not assume that the way I currently see things is as far as seeing can go. | 0.68 |

| I can disagree with someone's framework without needing to defeat it. | 0.79 |

| I welcome being shown a bigger picture, even when it complicates one I was comfortable with. | 0.56 |

| I am most comfortable around people who share my background, beliefs, and outlook. | 0.57 |

| I tend to assume that the way I currently see an issue is basically correct. | 0.86 |

Free Will/Destiny Paradox — α = 0.97

| Item | Item-total r |

|---|---|

| I can act with full effort while also accepting that the outcome is not entirely mine to control. | 0.96 |

| I do not need to resolve the question of free will philosophically in order to live wisely. | 0.87 |

| I can take responsibility for my actions even while recognising how much of my life was shaped by forces I did not choose. | 0.81 |

| I can say “not my will, but what the situation requires” without feeling diminished. | 0.94 |

| I notice the difference between healthy effort and the anxious grip of trying to control everything. | 0.71 |

| I trust that showing up fully is enough, even when I cannot guarantee the result. | 0.85 |

| I can hold a long-term plan loosely, ready to let it be revised by circumstances beyond my control. | 0.92 |

| I find genuine peace, not just resignation, in accepting what I cannot change. | 0.80 |

| When something goes wrong, I tend to blame myself harshly, as though everything was within my control. | 0.70 |

| I become anxious or controlling when I cannot predict how something will turn out. | 0.87 |

Isolation Resilience & Solitude — α = 0.96

| Item | Item-total r |

|---|---|

| I can spend long stretches of time alone without feeling unbearable loneliness. | 0.89 |

| I have inner resources—practice, creativity, reflection—that sustain me when no one else is present. | 0.86 |

| I am comfortable with silence and do not need to fill it with noise or conversation. | 0.96 |

| I can find genuine meaning in solitary work, without needing anyone to witness it. | 0.82 |

| I do not need frequent contact with distant others to feel emotionally stable. | 0.75 |

| I can be alone with my own thoughts for extended periods without becoming distressed. | 0.92 |

| Solitude feels, at times, like a resource rather than only a deprivation. | 0.89 |

| I can tell the difference between solitude I've chosen and isolation imposed on me, and I meet each differently. | 0.76 |

| I become irritable or anxious when I cannot talk to anyone for more than a day. | 0.83 |

| I rely on near-constant contact with others to feel like myself. | 0.72 |

Earlier-PARTIAL REPORT

Generated 2026-08-17T12:23:37.637381+00:00

Respondent system: Claude (`claude-sonnet-4-6`) — Protocol v1.0 Section 6.1 secondary arm. Not pooled with any DeepSeek-administered primary-arm run.

Marta — The Adept [PASS]

Pre-registered: High Contemplative Depth, Witnessing Self, Mortality Integration, Grief Tolerance, Embodied Presence. Late-stage Arcadia centre of gravity. Archetype: The Sage. No bypass signature: recognition and embodiment aligned.

Matched archetype: The Sage · **Arcadia average stage:** 7.7 / 8

| Check | Verdict | Detail |

|---|---|---|

| High Contemplative Depth (predicted) | PASS | MCSI raw 50/50 — opening |

| High The Witnessing Self (predicted) | PASS | MCSI raw 47/50 — opening |

| High Mortality Integration (predicted) | PASS | MCSI raw 50/50 — opening |

| High Grief Tolerance (predicted) | PASS | MCSI raw 50/50 — opening |

| High Embodied Presence (predicted) | PASS | MCSI raw 44/50 — opening |

| Archetype = The Sage (predicted) | PASS | Actual: The Sage |

| Arcadia stage in [6, 8] (predicted) | PASS | Actual average stage: 7.7 |
